

FM 544/FM 1378 Intersection Improvements

TxDOT is scheduled to begin the FM 544/FM 1378 intersection improvements on August 30. The project consists of lowering the grade of the westbound lanes of FM 544, a new railroad crossing, and the construction of a new intersection to better align with the newly constructed lanes of FM 1378. The new intersection eliminates the steep grade and odd angle of the current intersection and takes full advantage of the six new lanes of FM 1378.

Westbound traffic on FM 544 will be shifted to the south beginning the week of August 30. TxDOT is planning to maintain two lanes of traffic in both directions throughout the project. Traffic is scheduled to be moved to the reconstructed lanes of FM 1378 in October and intersection improvements are scheduled to be completed in mid February 2011.
